

RAJA MUHAMMED OMAR

+1 (825) 736 6606 raja.omar@ucalgary.ca [GitHub](#) — [LinkedIn](#)

EDUCATION

Bachelor of Science in Computer Science (concentration in Software Engineering)

University of Calgary

Expected: 2026

SKILLS

Languages and Technologies: JavaScript, Python, Java, C#, HTML, CSS, React, Blazor, MongoDB, Firebase, PostgreSQL, Django, Scrapy, Express.js, Node.js, ARM Assembly, Git, Azure DevOps

EXPERIENCE

Software Developer Intern

Arcurve

May 2024 – Present

Calgary, AB

- Developed and deployed numerous Razor components on an internal project management tool using .NET 6, Blazor Server, and MudBlazor, reducing the administrative workload by **20%**.
- Refactored an SMTP client-based email service written in C# and boosted the email sender score by **60%**
- Developed parsers to efficiently convert large volumes of HTML data to OpenXML format
- Consistently demoed newly implemented features to the project owner on a bi-weekly basis, receiving positive feedback each time
- Designed and built a website using SquareSpace for CSR projects led by interns, successfully raising over **\$4500** for charitable organizations

Backend Developer

Tech Start UCalgary

Oct 2023 – Apr 2024

Calgary, AB

- Pair programmed with the project lead to develop web scrapers to extract research papers from databases like Google Scholar, ACM, Science Direct and IEEEExplore
- Spearheaded both frontend and backend deployment utilizing AWS and Vercel and implemented CI/CD pipelines using GitHub Workflows
- Conducted code reviews, resolved merge conflicts and facilitated sprint planning/retrospective sessions

PROJECTS

For Your Research (*React, Typescript, Django, PostgreSQL, AWS*)

- Used Django to develop a RESTful API and integrated it with PostgreSQL database hosted on AWS RDS
- Utilized third party rotating proxy services to ensure consistent web scraping
- Deployed backend on AWS Elastic Beanstalk with SSL certificate provisioned via AWS Certificate Manager for secure HTTPS access

Ghosted (*React, Express.js, MySQL, Docker*)

- Developed a platform that connects customers with local ghost businesses, offering a centralized space for product display and direct customer-seller chat
- Implemented database operations for CRUD functionality using MySQL
- Implemented RESTful API endpoints using Express.js for managing various resources, including creating, reading, updating, and deleting records

MediSync (*React, Figma*)

- Worked in a team of 4 to design and develop the user interface of a clinic's appointment management tool
- Utilized TCSD (Task Centered System Design) methodology for guiding design and development
